Re: GCSD Sewer Collection System Improvement Project

Property Address:

Property APN:

Dear Property Owner,

Groveland Community Services District (GCSD or District) is performing wastewater collection system improvements to its assets throughout Big Oak Flat, Groveland, and Pine Mountain Lake. The improvements include sewer pipe replacement, pipe rehabilitation, pipe spot repairs, manhole replacements, and manhole rehabilitation. The work ensures the integrity, reliability, and longevity of GCSD's wastewater collection system.

Starting 7/25/2022, continuing for three to four weeks, you will see the contractor in your area performing the wastewater collection system improvements shown on the drawing included with this letter. During daytime work hours, Monday – Friday, you may experience periods of construction and equipment noise, dust, traffic delays, and open trenches. The contractor will be traveling to and from the construction areas using the roads, GCSD sewer easements, and the public utility easements as they perform their work. The sewer easements may pass through your property, and the public utility easements are located on your front, back, and side property lines. During their work, the contractor will attempt to minimize disruption to your daily life and property. Before the work is completed in your area, the contractor will return the easements and construction areas to the same, or better, condition they were in before the work.

If you have any questions or concerns, please contact the District at (209) 962-7161.

Sincerely,

Adam Ahlswede
District Property, Easements, and Assets Manager
